

# 1 Summary statistics

| Group  | Variable             | N   | M     | SD   | 95% CI         | Min   | Max   | Median | Skew  |
|--------|----------------------|-----|-------|------|----------------|-------|-------|--------|-------|
| Female | exam_score           | 120 | 65.69 | 8.31 | [64.19, 67.20] | 44.84 | 84.12 | 66.27  | -0.17 |
| Male   | exam_score           | 120 | 65.44 | 8.03 | [63.99, 66.89] | 44.91 | 81.23 | 65.83  | -0.19 |
| Female | study_hours_per_week | 120 | 6.80  | 2.37 | [6.37, 7.22]   | 1.84  | 11.44 | 6.67   | -0.07 |
| Male   | study_hours_per_week | 120 | 6.59  | 2.48 | [6.14, 7.04]   | 2.14  | 11.62 | 6.45   | 0.11  |

Descriptives summarize your data: the mean and median show the center, the SD and range show the spread, and skew/kurtosis show how far the shape departs from a normal bell curve. There is no significance test here.

Table X reports descriptive statistics for the study variables.

Statistical basis: Descriptive statistics table (mean, SD, median, min/max, N, skew, kurtosis) (Revelle W (2024). psych: Procedures for Psychological, Psychometric, and Personality Research. Northwestern University, Evanston.).
